

Statement of the Colorado Water Congress in Support of SB 20-201

Submitted by Dianna L Orf on behalf of the Colorado Water Congress

The Colorado Water Congress strongly supports SB 20-201, the Species Conservation funding bill. The Species Conservation program in the Department of Natural Resources is designed to conserve native species that state or federal law list as threatened or endangered or that are candidate species or are likely to become candidate species as determined by the United States fish and wildlife service. These conservation activities are critical to allowing important water projects, agricultural practices, construction projects and recreational activities to proceed in compliance with federal law. We urge your YES vote on this important bill.
