Representing

Boulder County
Commissioners' Office

Testimony

Boulder County supports SB 20-055. We are grateful for the diligence of the bill sponsors and advocates to work over the course of many months, going back to last year's interim committee, to develop and refine this legislation to support the development of recycling end markets in Colorado.

Given the collapse of international recycling markets, particularly in China, it is more important than ever that we find new markets, including domestic ones, for these materials. This is critical for local governments such as Boulder County that operate recycling programs, so that we have a sustainable market and a viable financial model to continue providing recycling services to our community.

Sincerely,

George Twigg, Policy Analyst
Boulder County Commissioners' Office
