Stan	Dempsey	Against	Colorado Mining Association

Testimony

Committee Members,

Boulder County appreciates this opportunity to express its strong support for SB 20-204. This legislation will provide a robust, sustainable funding source for CDPHE's critical work to protect our air quality. The General Assembly has taken many actions over the past year to put in place a strong air quality policy framework. This legislation will help to ensure that those policies can be implemented in an effective and fair way.

We are very appreciative of the leadership shown by Chair Jackson, Senate Majority Leader Fenberg, and Rep. Caraveo in bringing this legislation forward. It is an important step in the ongoing efforts to improve Colorado's air quality, which in turn will help to improve the health of our communities, particularly on the Front Range.

Thank you for the opportunity to show Boulder County's support for this important legislation.

Sincerely,

George Twigg, Policy Analyst
Boulder County Commissioners' Office
